

Role of Water User Associations in Minor Irrigation Scheme.

WUA is a single window delivery system for all project interventions. All the water user farmers of the irrigation command area of a Minor Irrigation scheme are organised in the form of Water User Association (WUA). WUAs are registered under Societies registration act 1961. WUAs take active part in the project planning, implementation and effective functioning of Minor irrigation schemes. WUAs are distributing water, Looking after operation & maintenance, resolving conflicts and collecting water charges for the water services provided to its beneficiaries on agriculture, horticulture and fishery activities if any. Economic activities made by the WUAs makes them more vibrant, effective & sustainable. Women & tribal dominated WUAs showing better performance especially in fisheries, cultivable private wasteland with mixed fruit plantation orchards etc.

Role of Water Users Associations (WUAs)

ABC

Details of WUA activities are available in Sub-menu: WBADMIP under Project menu.
